**Natural Rubber Foam – Soft, Safe and Fun for All Ages!**

# FAQS

## 1. WHAT ARE THESE TOYS MADE OF?

Our toys are made from natural rubber foam, then covered (flocked over) with nylon flock which is sourced from the finest flock companies in Spain & Switzerland.

## 2. WHAT ARE THE ADVANTAGES OF RUBBER FOAM OVER SYNTHETIC FOAM?

Besides being durable, flexible and stronger than synthetic foam, natural rubber foam is also antimicrobial, dustmite resistant, mildew resistant, flame retardant and hypoallergenic. No fossil fuels are used to make natural rubber.

## 3. WHY ARE RUBBABU TOYS CONSIDERED GREEN & BIODEGRADABLE?

Natural rubber foam is made from the sap of the rubber tree. The tree does not have to be cut down, making rubber a renewable material. It is also 100% biodegradable. Therefore, except for the nylon covering and ABS used in our tires, axles/hubs, Rubbabu toys are biodegradable.

## 4. ARE RUBBABU TOYS HANDMADE?

Yes. The manufacturing process is similar to bread making. The rubber foam is hand poured into moulds and slowly baked. Then each toy is dried, painted and flocked individually by hand, giving you lovely handmade toys.

## 5. WHAT MAKES THE FOAM SO STRONG?

Our foam is pure, therefore strong. We do not dilute our product with fillers (such as silica or china clay) the way some other brands do.

## 6. ARE RUBBABU TOYS SAFE FOR BABIES AND TODDLERS?

Yes. All toys graded 0+ pass safety tests for all ages and are made of completely safe materials and colours. However, these toys are not teething toys and require adult supervision when used by teething children.

## Our Story

With three kids of their own, Rahul and Meera knew that simple and safe toys were all kids needed.

They designed a range of balls, cars, animals and blocks that would be made out of natural rubber foam and covered with a soft nylon finish. The soft squishy material would keep kids safe, and the velvety surface made the toy tactile. Moreover they would be using a natural and biodegradable material, which was important to them. They setup a factory called Iseo wher they started making

simple classic toys designed for creative and imaginative play.

**The soft squishy material would keep kids safe, and the velvety surface made the toy tactile.**

Rubbabu Toys are made from foamed natural rubber, a squishy soft material ideal for babies and toddlers. They use simple classic shapes, bright fun colors, and have a tactile and fuzzy surface that feels amazing to touch. Best of all, they are safe from birth up!

## Finally ! An Alternative to Polyfil

Join us in putting a stop to polyfil; polyfil is...

- Destroying life by killing the smaller aquatic life
- It is dangerous to children, small strands get ingested
- It is not biodegradable
- Stuffed toys cannot be easily washed, get lumpy
- We have the alternative

No polyfil  
Green  
Biodegradable  
Sustainable

This polyfil is **killing**  
**our aquatic life** and  
**harming our children.**

Time to **stop** using it.

Polyfil
